I'm a creative designer, marketer, writer and social media strategist with a deep background in digital and print content, graphic design, brand storytelling, and campaign execution.

From conceptualizing viral charity campaigns to building data dashboards for C-suite, I bridge the gap between compelling creative and measurable performance — at agencies, charities, hotels, and tech-forward workspaces.

Fluent in the full stack of modern marketing: Adobe CC, Figma, Google Analytics, SQL, and everything in between.
